

Are you embarrassed with your smile? Considering having some cosmetic dentistry work done?

Do you know what a positive impact having a nice smile would have on your life but remain hesitant as you are just not sure your new smile will turn out how you want it to?

Wouldn't it be fantastic if you had a magic mirror to the future before making that life changing investment, to try before you buy, and preview the end result? Like all cosmetic procedures, people always wonder how they will look afterwards and whether it will be worth the money spent.

The answer is here - Tooth-pix - new and innovative imaging technology developed here in New Zealand is now available to be your magic mirror.
